Batch Tracking Software

Created originally for small to medium sized manufacturers in the food, beverage, and pharmaceutical sectors. This software is suitable for any BoM/recipe based producers.

Control your business and track components from procurement of raw materials to finished goods.

- ✓ Procurement
- ✓ Raw materials receipting
- ✓ Bill of Materials (BoM)
- ✓ Batch control
- ✓ Manufacturing
- ✓ Packaging
- ✓ Work in progress, finished goods
- ✓ Multi-location Inventory
- ✓ Sales tracking
- ✓ Auto inventory rebalance
- ✓ Customized links to finance,/GL
- ✓ Expiry/Best Before control

Tracking

The software keeps track of raw materials from point of origin, to BoM manufacturing, work in progress, and finished goods inventory. It tracks multi-location inventories, to client sales, allowing identification of any batch through all stages of manufacture, and all ingredients back to source. It can also manage product recalls.

This software package can be adapted to compliment existing Warehouse Management Systems and accounting packages.

Customer sales can be recorded live via a web interface to your software system adjusting sales and inventory accordingly. Any sales can be registered to specific clients or productivity requirements. Times, dates, and locations are all recorded for each sale.

Automation

The software can be set to automatically create batch numbers for raw ingredients, if the suppliers do not use them. It can also do the same for manufactured goods.

You choose the format.
